***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Allowable Subject Matter***

2. Claims 1-23 and 32-35 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior arts fails to teach a driving circuit for a display device for generating a signal to allow a display section to display, the driving circuit comprising: a digital signal processing circuit for processing a digital signal; a digital-to-analog converter circuit for converting a digital signal to an analog display signal; and an analog signal processing circuit for processing an analog display signal; wherein when a predetermined power save is instructed, the digital-to-analog conversion process and the analog signal processing circuit operate with a supply voltage less than the supply voltage during normal operation and which still allows the digital-to-analog converter circuit and the analog signal processing circuit to operate; wherein a period in which the predetermined power save is instructed and the supply voltage is reduced includes a period in which display data is written to the display section and a display is realized; and wherein during a period in which the predetermined power save is instructed and the supply voltage is reduced, the digital-to-analog converter circuit outputs an analog display signal corresponding to a digital display signal.
